

## MIS INTERNATIONAL SCHOOL, BALEWADI

### SESSION 2025-26

<b>VENUE</b>	Respective Class Rooms
<b>EVENT</b>	Eco-Friendly Celebrations
<b>PARTICIPANTS</b>	Students from Grade 1 to 12

The celebrations placed a strong emphasis on eco-friendliness, encouraging students to explore sustainable practices through art and design under Eco Clubs for Mission Life. All participants were required to use **100% eco-friendly materials**, reinforcing the school's commitment to environmental responsibility. The items used—including natural leaves, flowers, recycled paper, cardboard, cotton thread, and cloth scraps—were carefully selected to minimize environmental impact.

This initiative aimed to cultivate awareness among students about the importance of reducing waste, reusing available resources, and choosing materials that are biodegradable and environmentally safe. By working exclusively with natural and recycled items, students gained a deeper understanding of sustainable craftsmanship and the significance of adopting eco-conscious methods in their creative processes. Such activities would offer opportunities to promote creativity as also environmental awareness, highlighting the adverse effects of non-biodegradable items and benefits of eco-friendly alternatives. Students also able to better understand the global relevance of local practices. Promoting eco-friendly celebrations through the suggested activities also offers opportunity to develop key competency.

Through this eco-friendly approach, the competition not only showcased artistic excellence but also instilled a sense of responsibility toward the environment. Each creation reflected thoughtful material selection and a genuine commitment to promoting sustainability, aligning perfectly with the school's vision of fostering environmentally aware and responsible citizens.
