

CircularNo:MIS International School/ExtCircNo.81/Grades: NurserytoXII/ UsageOfPlastic/02.03.26

Dear Parents

As the new session approaches, we would like to re-emphasize the importance of reducing plastic usage. Unlike other materials, plastic does not biodegrade. It can take around 1,000 years to break down, accumulating in the environment and causing severe consequences. Plastic pollution chokes marine life and wildlife, damages soil, contaminates groundwater and can have serious health impacts.

Kindly note that to preserve our environment, students are not allowed to use plastic bags in school.

If needed, you may use paper bags, cloth bags, or jute bags. Kindly avoid using plastic bags outside school as well. Students are encouraged to use reusable water bottles. We also recommend that plastic lunch boxes are not used.

Warm Regards

*Dr. Monika Chhabra*
